China Steel Corporation is checking/controlling the raw materials and the delivered steel materials according to the relevant law, and free from radioactive.

- The material(raw materials ,accessories) is coming in to the territory of “ (China Steel Corporation/Republic of China) ” through radioactivity checking equipment.
- Specific radioactivity (Cv/hr) is measured from each heat of steel produced. We guarantee that in each Mill Test Certificate that the delivered materials have radioactivity value under 0.2×10^{-6} Cv/hr.

The types of the measuring machine are ASM 7500 and LUDLUM 44.2 .
